

Hangman Game - Python Program

Program Code

```
import random

words = ["apple", "banana", "orange", "mango", "grapes"]
word = random.choice(words)

guessed_letters = []
wrong_guesses = 0
max_wrong = 6

print("Welcome to Hangman Game!")

while wrong_guesses < max_wrong:
    display_word = ""

    for letter in word:
        if letter in guessed_letters:
            display_word += letter + " "
        else:
            display_word += "_ "

    print("\nWord:", display_word)

    if "_" not in display_word:
        print("Congratulations! You guessed the word:", word)
        break

    guess = input("Enter a letter: ").lower()

    if guess in guessed_letters:
        print("You already guessed that letter!")
        continue

    guessed_letters.append(guess)

    if guess not in word:
        wrong_guesses += 1
        print("Wrong guess!")
        print("Remaining chances:", max_wrong - wrong_guesses)

if wrong_guesses == max_wrong:
    print("\nGame Over!")
    print("The correct word was:", word)
```

Sample Output

```
Welcome to Hangman Game!

Word: _ _ _ _ _
Enter a letter: A

Word: _ _ a _ _
Enter a letter: S
Wrong guess!
Remaining chances: 5

Word: _ _ a _ _
Enter a letter: A
You already guessed that letter!

Word: _ _ a _ _
Enter a letter:
```
